

Mung Bean and MicroSoil®

- Name of farmer: Md. Allauddin
- Village: Naohata
- Trial area: 1 000m²
- Seed: Barimukh-6
- Comment: It is found that the performance of the plot cultivated with MicroSoil® is better. With the same application of fertilizers and seed at the same time the yield at the control plot is less than trial plot
- The farmers are interested to use MicroSoil® in Mug-been cultivation
