MicroSoil®'s **TailorMade™** Soil Enrichment Program *Above and Beyond Organics™*

What is the MicroSoil® TailorMade™ program?

MicroSoil® is a unique proprietary program utilizing a safe complex of an all-natural formulation of natural occurring ingredients, polysaccharides and polypeptides that helps to enrich the soil and to fundamentally improve overall agricultural performance by promoting significantly increased native microbial activity.

Click: <http://microsoil.com/microsoil-tailormade-fertilization-program/>

- The MicroSoil® program includes an initial and complete soil analysis and customized program to replace missing soil elements.
- MicroSoil® then builds nitrogen fixing micro-organisms, beneficial “native” soil micro-organisms, and aids in building organic matter in the soil.
- MicroSoil® is not a fertilizer, a replacement for a fertilizer or a substitute for any soil element. It cost effectively catalyzes the safe, natural and very efficient plant utilization of all soil nutrients.

Why should I use MicroSoil®? Click: <http://microsoil.com/faqs/>

Results include some or all of the benefits below:

- **Increased profits of 15% - 30% more per acre**
 - * Increased crop yields – as high as 30% or more
 - * Reduction in use of chemical fertilizers and pesticides – as much as 25% to 70%
 - * Builds massive root systems / accelerated blooming / faster plant maturity / earlier harvests / more harvest cycles each year
- **Better, healthier and more nutritious products**
 - * Increased BRUX and protein levels
 - * Enhanced taste and nutrient content
- **More sustainable soil characteristics and reduced environmental impact**
 - * Increased organic matter and soil fertility
 - * More balanced soil pH
 - * Significantly reduces leaching of nitrogen
